

Sunshade Systems

Whether your goal is to make a creative transition between the structure and the environment or to enhance an already existing structure, Sunshades give you the flexibility in design to achieve a dynamic effect with the ability to reduce heat gain while allowing direct sunlight to illuminate the interior space. Sunshades are aesthetically driven yet cost effective and all are custom produced. We work closely with architects and designers to achieve the desired look and effect.

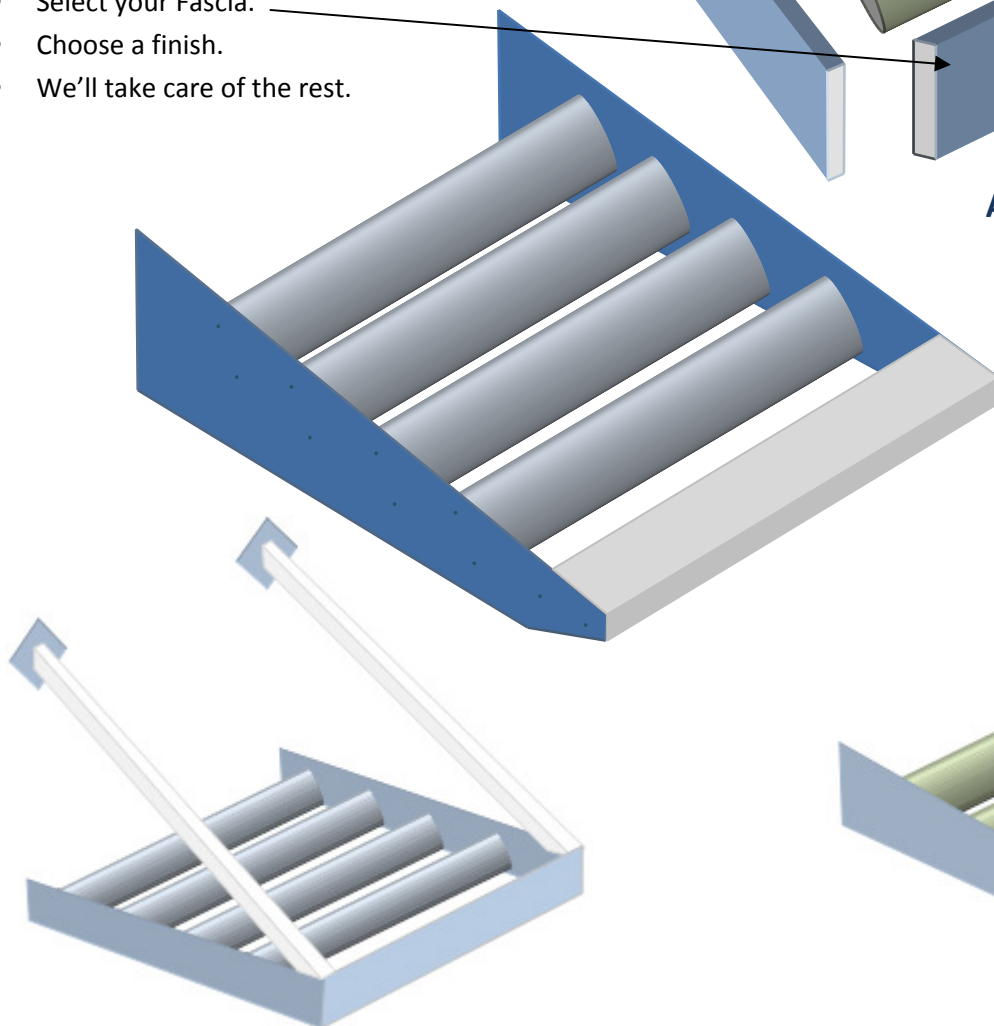

Custom Design Your Sunshade Project with Perfection Standard Sunshade System Components.

- First select your Outrigger Type and Style
- Then Pick your Infill Type and Size.
- Select your Fascia.
- Choose a finish.
- We'll take care of the rest.

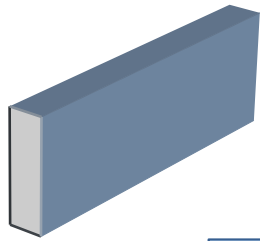

An uplifting enhancement to any building.

Available in multiple configurations to accommodate any design.
